

QUALITY POLICY

DFK Cab, s.r.o. has been manufacturing cabins since 1997. Our customers include leading importers and distributors of forklifts, UTVs, and ATVs in the Czech Republic, EU countries, Asia, the USA, and Canada.

Currently, we produce full-metal cabins, polycarbonate cabins, and PVC cabins for most forklift, UTV, and ATV brands. We use components supplied by renowned European manufacturers, ensuring the high quality of our products. DFK Cab, s.r.o. has implemented an ISO 9001 quality management system and holds CE certifications for all its products.

DFK Cab, s.r.o. is committed to environmental protection in accordance with ISO 14001. We strive to incorporate the highest possible number of recyclable materials into our products.

The Management of DFK Cab, s.r.o. Establishes the Following Quality Policy:

1. VISION

To fulfil and satisfy customer requirements while anticipating their needs. To provide high-quality services within the company's business scope. To approach new customer demands creatively.

To implement new knowledge in production to ensure products remain competitive and meet both legislative and customer requirements.

2. QUALITY POLICY

1. Provide high-quality products that are acceptable to customers and offer opportunities for further cooperation in the future.
2. Innovate products according to market demand.
3. Continuously improve the Quality Management System (QMS) to enhance production efficiency.
4. Ensure that not only the company's management but all employees feel responsible for the effective functioning of the QMS and contribute to its continuous improvement, including environmental protection.
5. Conduct regular management reviews of the QMS to analyse the achievement of quality objectives and, based on the updated quality policy, set appropriate quality and environmental protection goals.

6. Regularly review the quality policy established by the company's management to ensure its continuity, relevance, and alignment with the company's actual intentions.
7. Align employee interests with the company's quality policy and objectives.
8. Establish a strong connection between employee satisfaction and customer satisfaction.
9. Utilize modern technologies and advancements in scientific and technical development.
10. Achieve high professional and ethical qualifications for all company personnel at all levels of management and production processes.
11. Ensure strict adherence to the implemented quality system, which is continuously monitored, updated, and improved.
12. Monitor trends in quality policy and environmental protection, applying new knowledge for the benefit of both the company and its customers.
